

March 25, 1974

suggestion we'll leave the committee amendments to this particular department until we go through the bill. In the Department of Public Institutions starting on page 6, we have the Central Office, this includes basically, and this is the administrative arm of this department. And this includes basically a continuation budget, which includes salary adjustments data processing funds, and then if you will check at the bottom of page 6, starting on line 22, you will find that we are talking specifically about data processing that will begin to bring to the Legislature a little clearer picture of what this department is doing as care of patients is concerned. When we get in the area of Mental Health for instance, you will find that the department has great difficulty in telling us how many out-patients they have once they leave the institution. And where these people are, and what kind of care they are receiving. You will find on page 8, we talk about Program 367, which has to do with the care of alcohol patients. Just a second, Mr. President. I would refer you now to the bottom of page 9, where it talks about the Office of Mental Retardation. Which includes at the top of page 10, the definition of the planning and the reporting that must be done in this area as far as the Office of Mental Retardation is concerned. If you are interested in this area this is the administration that determines how much money goes to the local community retardation program. And starting with the bottom of page 10, going through page 11 to the top of page 12, are specified specifically the General Fund, the Cash Fund and the Federal Funding for the different Mental Retardation Regions throughout the state. Now we have felt that you ought to spell out where the money goes, and to which region. Page 13, line 5, we talk about the Nebraska Veterans Home, and the money that's applied here on the bottom of page 13 we are talking about the Nebraska Psychiatric Institute. And I would call to your attention that we have in the amount of \$100,000 to once again try to beef up the psychiatric program as far as training of Psychiatrists. We started this last year. This is a continuation of this program.

PRESIDENT: Senator Marvel, if there are questions as we go here I presume that you would be willing for Senators to ask them. Or do you want to go through the whole thing and then come back...

SENATOR MARVEL: No, I think it would be easier on us, and easier on the staff if the questions were posed as we went along. Are there some who have questions at this stage.

PRESIDENT: As Senator Marvel proceeds, if you do have questions. If you will put your light on, I'll recognize you. Senator Kennedy.

SENATOR KENNEDY: Senator Marvel, if we went back to page 4, well let's go into page 5. Let's say, and you are acquainted in the Norfolk problem that we have with the Regional Center and the Veterans Home there. Would this jurisdiction be under I think as you've titled it over here, the agency. Would this be under Dr. Jack Anderson, for making decisions for both the administrative, the Veterans administration and the Regional Center? Under your language?
